

500kW Gambian collapsible container for oil refineries

Looking for oil refinery equipment for sale? We source crude oil distillation units, hydrocracking systems, and modular refineries from trusted manufacturers.

The BESS Container 500kW 2MWh 40FT Energy Storage System Solution is a cutting-edge, highly integrated energy storage solution designed for large-scale applications.

A modular refinery performs the same core functions as a full-scale complex; it simply distributes them across transportable skids that lock together on a compact slab.

A crude oil storage tank is a container for storing crude oil or other petroleum products, usually can be found in refineries, oil fields, oil depots, and other industries.

The modular storage tanks are highly flexible for storing recovered oil in remote locations and environments. They can quickly be erected for instant operational use and disassembled compactly ...

Kinetica Global offers scalable, efficient modular refineries designed to process crude oil while meeting stringent environmental and quality standards, including Euro V and IMO 2020.

The fully automated, horizontally folding container that combines up to 4 empty containers into one.

In oil fields, small, modular tanks are used, while in refineries and terminals, large-volume tanks welded on-site predominate. In addition, in urban distribution centers, compact, buried or ...

A modular refinery is a prefabricated processing plant designed to distill crude oil into naphtha, kerosene, diesel, residual fuel oil, and off-gas using a crude distillation unit (CDU).
