

BESS solar panels installed on Hungarian roofs

In 2024, the company acquired French battery storage developer Comax, and it now plans to expand co-located BESS installations alongside solar power plants across multiple countries.

Interested in integrating a 215kWh or 261kWh BESS solution into your Hungarian project? Contact SolarEast BESS today for a partnership discussion or customized system quotation.

The capacity of the BESS system can supply the entire street and decorative lighting of Budapest for four hours. The Swiss company MET Group has taken a key step in its decarbonization ...

Battery energy storage systems are a key element for the energy transition, as they allow greater penetration of renewable sources into the power grid, Dunamenti's Chief Executive Officer Peter Horvath said ...

This storage solution will enable the energy produced by local solar panels to be used more efficiently, reducing potential grid fluctuations and improving the overall reliability of the electricity supply. The ...

Historically, Hungary's regulatory framework did not provide clear guidelines for the integration of co-located BESS projects. This lack of specific regulation created uncertainty for investors and developers, ...

Teplöre is proud to announce the successful commissioning of its first Battery Energy Storage System (BESS) project in Budapest, Hungary. This milestone marks a significant step in our European ...

A subsidy scheme in Hungary for energy storage will drive huge growth in BESS deployments over the next few years.

This in-depth white paper from Solarplaza unpacks Hungary's rapid energy storage evolution, from the country's first national BESS auction and new co-location rules to a restructured grid access regime and ...

Due to recent changes to Mavir's operational code, the transition of granted grid connections from photovoltaic power production to BESS projects will be allowed. This new support scheme is expected to ...
