

Beirut Super High Current Capacitor

Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance than traditional capacitors. They deliver rapid, reliable bursts of power for hundreds of ...

Compared to other capacitor technologies, EDLCs (Electric Double Layer Capacitor) are outstanding for their very high charge storage capacity and very low equivalent series resistance (ESR).

These capacitors non-inductive, self-healing and are available either in dry type or partially oil impregnated construction type.

This combination of advanced technologies allows Eaton to offer a wide variety of capacitor solutions tailored to applications for backup power, pulse power and hybrid power systems.

These hybrid supercaps feature low equivalent series resistance for high power density with environmentally friendly materials for a green power solution. The HSH series is maintenance ...

Capacitors for power electronics require special high performance designs for varied applications. This catalog describes capacitors for a number of demanding applications where high currents and/or ...

Ultracapacitors complement a primary energy source which cannot repeatedly provide quick bursts of power, such as an internal combustion engine, fuel cell or battery. The future horizon looks brilliant ...

This supercapacitor not only delivers high Cs of 87.8 m F/cm² at a current density of 0.22 mA/cm², but also exhibits long cycling stability after 10,000 cycles.

A supercapacitor with constant-current charging produces a linear rise in voltage. The charge time is very short and takes seconds to complete compared to a lithium-ion battery charge ...

Supercapacitors are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for Supercapacitors.
