

Innovative battery management systems (BMS) are crucial to optimising battery use and performance. The EU-funded InnoBMS project aims to develop a cutting-edge BMS solution that ...

Our advanced state-of-charge management, AI-enhanced forecasting, and hybrid trading strategies have been instrumental in boosting efficiency and maximising returns.

Innovative solutions to improve battery cyclability by offering intelligent BMS. Wide range of services in stationary, e-mobility and marine applications to achieve a climate neutral economy.

MOBI's Battery Innovation Centre is the main Belgian expertise centre for research and development of energy storage systems for traction and stationary applications. It offers state-of-the-art facilities, ...

In Belgium, several key considerations are essential for anyone interested in the Battery Management System (BMS) industry. The regulatory environment is significant, with stringent EU directives ...

Discover how industrial batteries and smart EMS systems drive energy transition in Belgium: cut costs, earn flexibility revenues, and meet EU targets.

The new battery system joins Engie's expanding Belgian energy storage portfolio, which includes the operational Vilvoorde facility and the under-construction Kallo project.

The largest battery energy storage system in mainland Europe has gone live in Belgium, as Sungrow and ENGIE completed the first 400MWh phase of the 200MW/800MWh Vilvoorde project.

The battery systems will be used in stationary applications such as containers to support the grid and home storage solutions. The project is fully aligned with upcoming EU regulations, ...

The Automotive Battery Management System (BMS) market encompasses the development, manufacturing, and integration of electronic systems designed to manage rechargeable batteries ...

Belgium battery management systems
