

Benin electricity distribution

Where does Benin get most of its electricity from?

Benin primarily imports electricity from Nigeria and other neighboring countries. Based on 2013 data, Benin's national electrification rate reached 29% (9% in rural areas, 57% in urban areas). Limited and unreliable power is still one of Benin's major problems in the electricity sector.

What is the energy sector in Benin like?

The energy sector in Benin is primarily reliant on biomass and imported petroleum products, with two percent of net energy consumption coming from electricity. The page below gives an overview of the energy sector in Benin and explains Power Africa's involvement in the country.

How much energy does Benin use?

Benin's total energy consumption in 2009 was 3,475 ktoe (World Bank, 2009). The per capita energy consumption in the same year was 0.404 toe. This is about half of the average per capita energy consumption for Sub-Saharan African countries, and less than a quarter of the world average (World Bank, 2009).

What is Power Africa's involvement in Benin?

Power Africa has supported the development of 127 megawatts (MW) of electricity generation projects in Benin*. In addition, various firms have received U.S. Embassy support to move transactions forward. Power Africa's involvement in Benin is detailed in the page below, which gives an overview of the energy sector in Benin.
