

Brazil energy storage solar power station

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

WEG announces the construction of a new manufacturing plant dedicated to the production of battery energy storage systems (BESS) in Itajaí, Santa Catarina. The facility will be the most ...

Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.

Brazil's push to integrate energy storage into its power system is moving from pilot deployments toward industrial scale, with WEG confirming plans to build a dedicated battery energy ...

In Brazil's bustling economic hub, a groundbreaking energy revolution is taking shape. The Sao Paulo Photovoltaic Energy Storage Project stands as South America's most ambitious attempt to harness ...

The new plant is expected to generate around 90 direct jobs, contributing to local economic development. Battery energy storage systems play a critical role in stabilizing power grids ...

For Brazil, the 2026 auction could serve as a watershed moment -- defining not just how storage integrates into its National Interconnected System, but how the country approaches reliability ...

UCB Power has inaugurated what it says is Brazil's first photovoltaic power plant with sodium battery storage, installed in the remote Amazonian community of Tumbira. The project is a...

With solar irradiance levels that could make a desert jealous and a government pushing hard for energy transition, Brazil is fast becoming a laboratory for cutting-edge battery energy storage systems (BESS).

According to PDE 20341, the need for additional supply to meet the power requirement begins in 2027, reaching the order of 5.5 GW in 2028 and reaching more than 36 GW in 2034.
