

C-grade photovoltaic panel label

A visual guide to the specific labels and plaques required for solar PV systems by NEC Article 690, including placement and wording for all required warnings.

Grade C: These panels contain cells with significant defects, such as chips or irregularities, and are primarily used in regions with limited access to electricity, such as remote areas in developing countries.

Code-Making Panel 4 of the National Electrical Code recently completed its final changes to the NEC2026 code for articles related to labeling within the solar industry including PV labeling requirements.

The materials found in this section may be used to establish recommended local requirements for Installers and Designers, and can serve to validate the use of high performance adhesive labels, where local permitting ...

Designed to meet solar system labeling requirements. All of our PV labels are UL Certified and printed on premium outdoor rated vinyl with 7 year permanent adhesive.

Buildings with PV systems shall have a permanent label located at each service equipment location to which the PV systems are connected or at an approved readily visible location and shall indicate the location of rapid ...

(C) Single 120V Supply. The battery based inverter output is per-mitted to supply a 120V single-phase, 3-wire, 120/240V distribution panel marked with the following words or equivalent:

Learn how to meet NEC standards, understand which solar components require labels, and discover effective labeling solutions for solar equipment to keep your facility safe and compliant.

Every photovoltaic panel carries a nameplate label - its technical birth certificate. Unlike ordinary product tags that simply display prices, these specialized identifiers serve as compliance documentation and performance ...
