

Can UK energy storage projects be done

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

According to Solar Media, by the end of 2022, the UK had approved 20.2 GW of large-scale energy storage projects, which could be completed within the next 3-4 years.

The UK energy regulator, Ofgem, has advanced 77 Long Duration Energy Storage (LDES) projects into the next phase of its "cap and floor" revenue support scheme.

The UK's BESS capacity is set to triple by 2030. Discover how battery storage is crucial for decarbonization, grid stability, and long-duration storage.

Several projects are currently under development and with some expected to be operational by 2030, and the introduction of an investment support scheme will help deliver them.

Ofgem has confirmed that 77 LDES projects, totalling 28.7 GW, have passed the first eligibility stage under its new cap and floor scheme. Of these, 71 projects (24.5 GW) are expected to ...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. LDES projects include pumped storage ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to ...

Listed below are the five largest energy storage projects by capacity in the UK, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...
