

# Construction of wind solar and energy storage project in Moldova

Moldova is preparing for its second major renewable energy auction in autumn 2025, this time focusing on onshore wind farms equipped with integrated battery energy storage systems ...

Several bids were submitted for the auctioned capacities, resulting in five projects selected for wind farms and six for photovoltaics. "This means we are attracting investments to the ...

New high-capacity parks for producing energy from renewable sources, accompanied by energy storage batteries, are to be built in Moldova. The auction on this purpose is set to be ...

The tender committee for granting the status of eligible large producer has designated the winners for the construction of large wind and photovoltaic parks with a total capacity of 165 MW.

Moldova prepares a 170 MW wind and storage tender for 2026, introducing mandatory battery systems and clearer rules for hybrid projects. Learn how Moldova wind and storage tender supports national ...

The upcoming tender will include a proposed 173 MW of wind capacity and approximately 22 MW of battery energy storage systems (BESS), with the primary objective of ensuring grid stability.

Moldova has for the first time launched an open tender for the construction of onshore wind power plants with a capacity of up to 105 megawatts (MW) and photovoltaic solar power plants ...

Feb 5 (Interfax) - The Moldovan Energy Ministry will accept applications from potential investors until March 31 for constructing wind and solar parks with a total capacity of 165 MW, the ministry said. "Of ...

Moldova's ambitious push to transform its energy landscape through renewable auctions, especially the innovative integration of wind power with battery energy storage systems, marks a ...
