

Cuba communication base station wind power damaged

The grid failure follows a string of nationwide blackouts since late last year that plunged Cuba's frail and antiquated power generation system into near-total disarray.

Following the passage of Hurricane Ian in September 2022, Cuba's grid collapsed, leaving the entire country without power for several days. Authorities eventually re-established ...

At least four western provinces, from Pinar del Rio to Mayabeque, lost power early on Wednesday, officials said, though all had been reconnected to the grid within hours of the outage.

About half of Cuba was plunged into darkness on Thursday evening, followed by the entire island on Friday morning after the failure of the Antonio Guiteras thermoelectric plant in ...

The collapse of Cuba's largest power plant, Antonio Guiteras in the northwestern province of Matanzas, is behind the latest blackout. Set up in 1988, it had been undergoing extensive...

Cuba's energy crisis is causing widespread power outages due to outdated plants and a fragile grid, impacting daily life and nearing total failure.

The region, including Havana, remained under a hurricane warning. Cuba's state-run grid operator UNE said the high winds had caused the country's electrical system to collapse.

Top energy officials said a main transmission line connecting Havana with the country's largest power plant in Matanzas failed at about 5 a.m. ET but that workers had restored power to ...

Earlier this week, an outage hit Cuba's eastern region, leaving people from Las Tunas to Guant#225;namo in the dark for several hours.

In response, Cuba has launched a recovery plan aimed at restoring 489 MW of power by the end of 2023 through upgrades and investments, but the system continues to struggle without ...
