

Cuban solar factory produces solar panels

The company produces high-efficiency monocrystalline and polycrystalline solar panels, inverters, lithium, AGM and gel batteries, installation systems, and MPPT and PWM charge controllers, with ...

Cuba is facing a severe energy crisis with prolonged blackouts, while UNE promotes solar parks. Only 6 out of 15 thermoelectric plants are operational, and renewable sources account for less than 5% of ...

Thinking of solar manufacturing in Cuba? Our expert guide covers the critical infrastructure risks, from power stability to logistics, and offers proven solutions.

Not far from the ruins of an unfinished nuclear power plant in the Cuban province of Cienfuegos, hundreds of workers are hastily installing 44,000 solar panels as the island seeks once again...

Chinese and Cuban authorities signed an investment agreement to jointly implement a project to expand the use of renewable energy. In the short term, the investment project consists of installing...

A horse-drawn carriage passes a photovoltaic park in Yaguaramas, Cienfuegos Province, Cuba, where hundreds of workers are hastily installing 44,000 solar panels.

Now, it will host five of the solar parks to be built on the island. The region has an industrial port, a thermal power plant, and a refinery, making it a key area for the country's energy network.

Since the inauguration of the first of the 55 solar parks scheduled to come online during 2025, Cuban state media has focused on technical details and the economic benefits they'll bring.

Amidst an unprecedented energy crisis, the Cuban government has unveiled an ambitious plan aiming to produce nearly 600 MW of solar photovoltaic energy by the first half of 2025.

The project, located in Cotorro--on the outskirts of Havana--is part of the island's government's bet on solar energy to address the country's dire electricity situation.
