

# Customized 60kW Data Center Rack for Power Plants

Designed to increase flexibility and agility of data center power distribution through a design that does not require a raised floor.

Ability to customize Rack PDUs within our factories locally and pre-configure them to meet your needs. Some options configured in as little as 2 weeks with a minimum order quantity of 20! Alleviate cable congestion by ...

Scalable to 60kW per rack, the InRow RC's small footprint and modular design allows for placement within the row of racks to provide predictable, reliable, and cost effective cooling infrastructure in ...

Despite its robust power output, the modular UPS boasts a compact footprint that is ideal for space-constrained environments. You can configure it in a rack-mount or stand-alone configuration, making it ...

Regionally customized rack solutions engineered for your data center. Flex incorporates robotics and automation, including robotic welding and stamping, to enhance precision and production efficiency. ...

Access the rPDU remotely via the network interface or serial connection to monitor power consumption and configure user-defined alert notifications to prevent downtime.

Custom rPDU Options can include tailored receptacle counts, component layout, visual identification (labels and unit color), non-standard receptacles, and power capabilities in the 60kW to 135kW range.

While a standard rack uses 7-10 kW, an AI-capable rack can demand 30 kW to over 100 kW, with an average of 60 kW+ in dedicated AI facilities. This article provides a condensed analysis of these ...

American Power Conversion (APC) has unveiled new high density InfraStruXure(TM) systems that can scale up to 60kW per rack. According to APC, these are the first integrated systems on the market that ...
