

Desert Solar Power Station

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

The project supplies power to California utilities, the city of San Jose, the Clean Power Alliance, and several corporations. This corner of the desert is a hotbed not only for solar but also for ...

We plan to build a new natural gas plant, the Desert Sun Power Plant, west of Gila Bend. The Desert Sun site would be capable of adding up to 2,000 megawatts (MW) of reliable and flexible generation ...

How Arizona's Mesquite Solar complex became one of the nation's largest solar sites and what its growth reveals about the evolving U.S. clean-energy landscape.

The two largest solar power plants in the world--Desert Sunlight and Topaz Solar Farm, about 400 miles (640 km) to the west in central California--have come online in the past three months.

What was once the largest solar power plant of its type in the world appears headed for closure just 11 years after opening.

Arizona Public Service has unveiled plans for a major new natural-gas-fired generating facility west of Gila Bend that the state's business community is calling a smart investment in ...

The Cerro Dominador plant, for example, not only generates electricity during the day with photovoltaic solar energy. It also does so at night using innovative solar thermal technology that stores heat. The ...

Desert Sunlight represents a major milestone in scaling up solar technology as one of the largest completed PV solar projects in the world. The project will deploy First Solar's commercially-available ...

Explore the Ivanpah Solar Electric Generating System with aerial photographs. Discover insights into its impact on the renewable energy field and future plans for the facility.
