

# Do solar panels in Uzbekistan consume energy

Uzbekistan is making strides in renewable energy, aiming to exceed 18,000 MW of solar and wind capacity by 2030, which will enable the country to generate 40% of its electricity from sustainable sources, save billions ...

A declining average cost per panel makes solar energy more accessible and attractive to a wider range of consumers and investors, further accelerating its adoption in Uzbekistan.

Overview Government Policies Potential Photovoltaics Research and development Uzbekistan is a country in Central Asia with a growing demand for electricity. Solar power can play a role in meeting this demand, as the country has abundant solar resources and a strong potential for solar energy generation. The government of Uzbekistan has implemented several initiatives to promote the use of solar power, including the development of large-scale solar power plants and the introduction of incentives for individuals and businesses to install solar panels. Some of the benefits of solar power in ...

Uzbekistan has installed nearly 2,000 MW of small-scale solar capacity nationwide, generating clean energy, reducing gas consumption, and cutting emissions as part of its renewable energy transition.

In this episode of Business Line Uzbekistan, we look at how the country is rapidly embracing solar power, securing billions in foreign investment and cutting emissions to position itself as a...

To satisfy growing energy demand while promoting renewable energy use, the government of Uzbekistan has adopted a wide range of energy strategies and laws and has been undertaking energy sector reform to ...

Renewable energy in Uzbekistan is now a growing part of the national mix. In 2024, fourteen solar and three wind plants with a combined capacity of 4,100 MW began operating across ten regions. These ...

Uzbekistan is a country in Central Asia with a growing demand for electricity. Solar power can play a role in meeting this demand, as the country has abundant solar resources and a strong potential for solar energy ...

Households in Uzbekistan earned more than \$17 million from selling solar-generated electricity to the national grid in 2025, as participation in the state-backed "Solar home" program expanded sharply.

Between January and July 2025, solar panels installed on homes, businesses and infrastructure sites across Uzbekistan generated 875 mln kWh of electricity, according to the Ministry of Energy.

Mirziyoyev is pushing the use of solar panels, setting a goal of generating 1GW of power via solar panels on the roofs of businesses and private houses.
