

Estonia solar energy storage project

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, marking a crucial step toward synchronizing the Baltic power grids with the rest ...

With combined capacity of 200 megawatts of power and 400 megawatt-hours of storage, Hertz 1 and Hertz 2 will form one of the largest battery complexes in continental Europe.

Trinasolar, a global leader in PV and smart energy solutions, has announced the successful signing of a new Battery Energy Storage System (BESS) contract with leading Estonian ...

A 100MW/200MWh BESS project in Estonia has been inaugurated by Baltic Storage Platform (BSP), a joint venture (JV) between Baltic developer Evecon, French independent power producer (IPP) ...

Estonia is launching a major 300 MW solar-plus-storage project in Ida-Viru County, transforming a former quarry to boost renewable energy and energy independence.

The 100 MW/200 MWh battery energy storage project in Kiisa began operation on February 3 as scheduled - just two weeks after a testing fault at the facility caused the most significant ...

Estonian renewable energy developer Evecon, together with the French solar power company Corsica Sole and investment manager Mirova, on 3 February opened one of the largest ...

KIISA, ESTONIA - February 3, 2026 - The Baltic Storage Platform (BSP) - a joint venture between Baltics leading renewable energy developer Evecon, French independent solar power ...

This article explores the project's goals, technological innovations, and how it addresses grid stability challenges while supporting Estonia's 2030 green energy targets. Learn why this project matters for ...

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia.
