

Estonia to build 500 MW of solar

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it ...

The European Investment Bank (EIB), together with local commercial banks SEB and Luminor, is lending the Estonian renewable energy company Sunly EUR62 million to build and operate a ...

Estonia added a record 513 MW of new solar capacity in 2024, bringing its total installed PV capacity to more than 1.3 GW, according to the Estonian Chamber of Renewable Energy (Eesti...

This funding is earmarked for the development of 500 MW of new solar capacity, marking a substantial step forward for the region's green transition. The loan will finance the construction of ...

The solar park will be key to Estonia's renewable energy sector. Located in Lääne County, 65 kilometers from Tallinn, the Risti solar park will have a capacity of 244 MWp and will ...

Estonia has achieved an unprecedented increase in photovoltaic (PV) solar installations, adding 513 MW in 2024, marking a historic milestone for the country.

Expected to be the Baltics' largest photovoltaic facility and operational by 2027, the project aims to boost the region's energy independence and integrate advanced technologies like ...

The Climate Ministry has announced plans to get to 5,600 megawatts (MW) of renewable energy capacity in Estonia by 2035, focusing on expanding wind, solar, and energy storage.

The renewable energy company OX2 has signed a cooperation agreement with Dasos Capital, specialised investment company for sustainable forestry and natural capital, to develop 10 solar ...

Located in Lääne County, approximately 65 kilometres southwest of Tallinn, the solar park is expected to be operational by 2027 and will generate enough electricity to power over 80,000 Estonian ...
