

# GPS does not recognize the communication base station lead-acid battery

The 20 AH battery we purchased for the repeater is not adequate to run it all day, it lasts longer than 1/2 hour but not nearly 8 hours, adding the 2 watt base might overwhelm it.

You may need to replace the Base Station battery. When acquiring a replacement battery, make sure that you order a battery with the correct connector type, shape, size, and chemical composition.

We power two Trimble 5602 robotic total stations with jumpstart battery booster packs from BatteriesPlus. They seem to have steady juice, last several days and charge quickly.

Two valve regulated sealed lead acid type rechargeable battery. Shut down the GNSS Base Station. Remove the Radio Modem and put the antenna cable (s) carefully through the cable ...

A starting battery is made for the heavy load of starting an engine and then to be recharged right away if you want the battery to last. Running a "starting" battery down to near dead will ...

Learn how to troubleshoot common issues with your GPS unit. Follow our guide for quick fixes and solutions to keep your GPS device running smoothly.

A deep-cycle battery (e.g., trolling motor battery) is better in that regard, but you need to think about the risk of spilling acid. For those reasons, a long-time favorite has been Sealed Lead ...

While any 12V car battery might technically power your mobile base station, selecting the right battery for optimal performance and longevity requires understanding a few key factors.

Check Physical Connections. 2. Verify Radio Settings. 3. Power & Battery.

These battery tenders are not designed for communications type use, so may not have appropriate filtering. You could absolutely use the battery tender to charge the battery when the radio ...
