Hyundai announces the HTWO Energy Savannah, a scalable hydrogen production and refueling facility for zero-emission heavy-duty vehicles in the Savannah region.

Hyundai announced plans to launch a scalable hydrogen production and dispensing facility for Class-8 heavy-duty zero-emission vehicles. The station will be located just 10 miles (16 ...

The significant hydropower potential and reasonable wind and solar potential of the country, can be utilised for hydrogen production, exploiting the seasonal variability of hydro and the flexibility that can ...

HTWO Energy Savannah development is a collaboration between HTWO Logistics, HydroFleet, and Capital Development Partners, and is scheduled to begin operations in late Fall 2025.

An entirely new ecosystem of hydrogen production and development is taking shape, mainly because of climate change, and Georgia may be poised to become a hub for it.

HydroFleet's investment in Pooler is expected to bring significant economic benefits to the area, creating jobs and positioning Pooler, and the greater Savannah, GA area, as a leader in clean energy solutions.

Due to intermittency of renewables, the lowest cost green hydrogen option for Georgia would involve a blend of wind and solar resources, maximising electrolyser load factor and achieving a LCOH of ...

With proper investment, Georgia could see operational fueling facilities within the next few years. This transition toward hydrogen and EV technologies is critical for achieving long-term carbon ...

Hyundai announced Monday its plans to launch a scalable hydrogen production and dispensing facility in Georgia for Class-8 heavy-duty zero-emission vehicles.

Plug is building an end-to-end green hydrogen ecosystem, from production, storage, and delivery to energy generation, to help its customers meet their business goals and decarbonize the ...
