

Georgia solar energy storage investigation

Atlanta-based Georgia Power has filed a request with the Georgia Public Service Commission seeking certification for two new solar-plus-storage projects totaling 350MW.

When savings from avoiding the loss of power are considered, solar paired with battery storage was found to make economic sense for all building types evaluated.

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility said Tuesday.

Georgia law requires developers to provide a decommissioning plan as well as financial assurances for decommissioning activities. The plan should specify what needs to be removed, who is responsible ...

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed ...

In 2019, I joined the Georgia Solar Association ("GA Solar") Policy Committee and have supported their work related to monthly netting in the Company's 2019 and 2022 Rate Cases and on efforts to ...

GA Solar supports the distributed solar & storage industry and its customers across the state of Georgia. Our work benefits Georgia businesses, workers, residents, and ratepayers.

This article explores the latest developments, key players, and opportunities in Georgia's solar-plus-storage sector--a critical read for businesses and investors eyeing the clean energy transition.

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of battery storage that ...

In its IRP, Georgia Power detailed adding storage to solar projects, saying that its adoption of solar+storage versus solar-only generation at sites is currently at 17%. Georgia Power ...
