

Germany's grid-scale battery buildout hit a record year in 2025, with installed capacity now standing at 2.4 GW. But BESS additions come in slower than pipeline projections assumed, as grid connections ...

Following its groundbreaking ceremony on Tuesday, Eco Stor's 300 MW / 714 MWh project in Förderstedt, Saxony-Anhalt, has now taken the lead in terms of storage capacity, ...

Germany is about to become home to Europe's largest battery storage system - a massive 1 gigawatt (GW) / 4 gigawatt-hour (GWh) project in Jänschwalde, Brandenburg.

In the following, we provide an overview of the recent developments of the legal framework of BESS projects and outline which obstacles to BESS projects still require further efforts ...

German government opens public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES).

This week, Eco Stor is kicking off construction preparations for another large-scale battery storage system in Germany. The planned facility will have a capacity of 300 megawatts (MW) and ...

Germany is set to host Europe's largest battery energy storage project, with a new grid-scale facility planned for the Lusatia region. The project is being developed by Fluence Energy, a U.S. ...

Over 5 GW of energy storage capacity is on track to be delivered by 2030. European energy storage firm Return has unveiled the purchase of four ready-to-build and permitted battery ...

Enlight Renewable Energy Limited has entered into an agreement to acquire a majority stake in Project Jupiter, a large-scale co-located solar and energy storage project in Germany, in ...

Summary: Based on official data from Germany's Federal Ministry for Economic Affairs and Climate Action (BMWK), this guide details 2025 German energy storage policies, BESS (battery ...
