

Greece 400mw energy storage project

The list of winners in Greece's maiden tender for standalone battery energy storage system (BESS) projects includes seven companies with 12 proposals, Energypress reports.

Projects in this round will be eligible for funding of up to 200,000 euros (\$218,000) per megawatt of installed capacity. Although the specific technology was not specified, lithium-ion ...

As the regulatory environment stabilises and the market grows in scale and complexity, Greece is on track to become a leading European market for utility-scale battery storage.

The two projects were part of a total of 12 totalling c.400MW that won long-term capex support in the first round of a scheme aimed to kickstart the grid-scale storage market in Greece, run ...

Greece's energy regulatory authority RAE on Friday fired the starting gun on the country's first standalone battery energy storage system (BESS) tender, targeting 400 MW of capacity.

Swathes of energy storage projects including battery storage and pumped hydro have been approved by the regulator in Greece, as the country prepares for a big battery storage auction.

Greece's energy regulator has announced three separate auctions for standalone energy storage systems connected to electricity transmission networks. The application process for the first...

It is the first in a series of battery storage auctions scheduled for this year, starting with 400 MW in capacity, and the first competitive process for energy storage in Southeastern Europe.

The Regulatory Authority for Energy (RAE) in Greece has launched an auction for grants towards 400MW of energy storage, with three weeks to submit project proposals.

The country announced its 1 GW energy storage program in the summer with three separate tenders featuring 400 MW, 300 MW and 300 MW of capacity. The first tender awarded 12 energy storage ...
