

Has rooftop solar power generation collapsed

U.S. residential solar companies are preparing for a steep drop in business this year after the expiration of a federal tax credit that helped drive more than a decade of rapid growth, prompting ...

In an analysis last month, Morgan Stanley predicted that a full phaseout of solar tax credits would cause demand for rooftop panels to drop by 85 percent over the next 10 years. Other research...

A sweeping domestic policy bill passed by House Republicans could spell disaster for the U.S. rooftop solar industry, potentially halving installations next year and triggering widespread ...

Provisions in the GOP policy bill would end a host of tax credits for renewable energy, including one that allows homeowners to recoup 30 percent of the cost of a rooftop solar system....

Residential solar installations declined 31% in 2024. Over the last year, industry titans like SunPower, Sunnova, and Mosaic Solar have filed for bankruptcy.

Let's get one thing clear: While the solar industry isn't collapsing, it isn't at its peak. "It definitely is a tough time for the residential solar market," Gaston said.

Despite current setbacks, the long-term outlook for rooftop solar remains positive. The Solar Energy Industries Association projects a recovery, with an expected 10% average annual ...

Though solar represented just 3.4% of the nation's electricity generation in 2022, studies show that rooftop solar could eventually meet residential electricity demand in many states if...

Over the past two decades, more than 5 million U.S. households from California to Georgia to Maine have put solar panels on their roofs, drawing energy from the sun and reducing ...

Now, the popularity of residential solar is seeing a steep reversal due to shifting state and federal policies driven by powerful utility interests. And while some say the decline is simply a mild ...
