

How much does a 12kW solar power system cost

How much does a 12 kW solar system cost?

A 12 kW solar panel system costs \$29,880 in 2025 before incentives. A 12 kW solar panel system produces about 17,420 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. The federal solar tax credit ends December 31, 2025--homeowners have only until the end of this year to secure 30% savings.

How much money can a 12Kw solar system save?

On average, homeowners can save up to \$3,723 per year by harnessing solar energy with a 12kW system. Over the panel's lifetime, which typically spans around 25 years, these savings can amount to an impressive \$93,075. The rising cost of electricity has been a growing concern for homeowners over the past few decades.

How much electricity does a 12 kW solar system produce?

(Load Per Day) On average, a 12kW solar system can produce around 60 kWh of electricity per day. This output is achievable if the panels receive at least 5 hours of sunlight. Consequently, the system can produce approximately 1,800 kWh per month and 21,900 kWh per year. There are also 13 kW solar systems if you need a different sized system.

Should you invest in a 12Kw Solar System?

Investing in a 12kW solar system can yield significant benefits, particularly for homeowners in areas with ample sunlight. With the potential to generate \$3,723 worth of electricity every year, the system offers a remarkable 20% return on investment based on the current costs of solar panels (around \$24,000 for a 12kW system).

A full breakdown of 12kW solar system prices, regional trends, and ROI insights to help you invest wisely in long-term clean power for your home or business.

EnergySage's guide to the cost of a 12 kW solar system, how much electricity 12 kW of solar panels will produce, and the smartest way to shop for solar.
