

Huawei wins bid for Saudi solar inverter

Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to be fully powered by solar and energy storage without connection to any power network.

Huawei has developed the world's largest microgrid power station which delivers 1 billion kWh power supply per year. The new solution will play a significant role in Saudi Arabia's Red Sea ...

It builds a product ecosystem centered on solar inverters, charge controllers, and energy storage to promote sustainable and efficient utilization of solar energy.

Global technology giant, Huawei, is spearheading this ambitious venture, which is set to power this key hospitality destination being developed by Red Sea Global. Built on the coast of...

Huawei has been instrumental in this sustainable initiative, constructing the largest photovoltaic-energy storage microgrid station in the world station, featuring an impressive 400MW solar PV system coupled with a 1.3GWh energy storage system.

Major PV inverter manufacturer, Huawei Technologies Co was selected as one of the three winners of the Intersolar AWARD 2019 for its SUN2000 15-20KTL series smart string inverter for commercial ...

China's Huawei has built a 400 MW/1.3 GWh solar-plus-storage off-grid facility in Red Sea New City, Saudi Arabia.

Global technology giant Huawei is at the helm of this groundbreaking venture. The Red Sea Project, spearheaded by Red Sea Global, aims to power a major hospitality destination along ...

Huawei Digital Power has signed a key contract with SEPCOIII for the Red Sea Project with 400 MW solar photovoltaic (PV) plus 1,300 MWh battery energy storage solution (BESS), ...

Beyond the Red Sea Project, Huawei is driving several major solar power developments worldwide, reinforcing its position as a leader in the renewable energy sector.
