What is an inverter-converter?

An inverter-converter (or inverter-charger) is a combination of an inverter and a converter in one unit, along with a transfer switch in most cases. This means that it combines the functions of an inverter and a converter.

Do I need a 60Hz inverter?

Here in the US, things run at 60Hz, in Europe and most other places around the world, things run at 50Hz. You'll most likely require a 60Hz inverter if you are running a device intended to run on US power. We like to go camping and travel quite frequently.

What is a 6V to 12V converter (inverter)?

The PGPI is a 6V to 12V converter for vehicles that still have a 6V, positive ground electrical system. It is necessary if you are still running positive ground for all of our radios, which run on a 12V, negative ground electrical system. The PGPI positive ground inverter comes with detailed wiring instructions.
