

Ireland purchases large amounts of energy storage equipment

EirGrid has opened consultation on its proposed procurement model for LDES, setting out how such storage assets will be financed, dispatched, and connected to the national grid. The ...

With a recent policy statement, Ireland is seeking to accelerate the growth and integration of battery and other storage systems into Ireland's electricity grid.

EirGrid has opened consultation on its proposed procurement model for long-duration energy storage (LDES), setting out how such assets will be financed, dispatched, and connected to ...

Analysis being conducted by ESI suggests that Ireland is going to need up to seven times more energy storage than what is being stored today. "That said, the Government does realise that, ...

Ireland has officially launched a procurement scheme targeting Long Duration Energy Storage (LDES), a crucial step to enhance the country's renewable energy infrastructure and secure ...

As renewables like wind and solar increase their share of generation, the need for flexible storage assets grows ever more urgent. The business case for utility-scale batteries in Ireland remains in a formative ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...

Developers have installed batteries in Ireland capable of storing up to 400 megawatts (MW) of electricity, equivalent to an average power station, but they are used only as a backstop to ...

The Government has said it wants to ramp up long-duration energy storage significantly, yet the proposed minimum procurement of 201 MW is still well below its 2030 goal of 500 MW.

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery ...
