

Is solar power generation frozen

After Storm Fern cut power to millions, GoodPower CEO Leah Qusba explains what really failed on the grid, and why wind and solar weren't to blame.

Trump has resisted orders from federal judges to restore clean energy funds, and he will most likely enact new limits once the freeze officially expires. But corporations and investors with ...

In The Looming American Electricity Affordability Crisis, Power The Future analyzed more than 500,000 federal electricity records and found a consistent national pattern: as dispatchable fossil fuel ...

Energy research firm Wood Mackenzie said it has identified 18 gigawatts of solar projects on federal lands that were canceled or are inactive due to limited development progress since the ...

President Donald Trump said the U.S. will not approve wind or solar power projects. Trump has tightened federal permitting for renewables with Interior Secretary Doug Burgum now ...

A funny thing happened on the way to President Donald Trump's mission to obliterate renewable energy. Solar and wind energy use is surging, especially globally, but even in the United ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

In early August, Nevada's Republican Gov. Joe Lombardo complained to the secretary of the interior in a letter that solar projects deep in the project pipeline have been frozen.

US President Donald Trump 's freeze on approvals for major onshore wind and solar projects is leaving thousands of megawatts of clean power capacity in limbo at a time of soaring ...

Just one solar project has been approved on federal lands since Trump took office in January, and none have been permitted since July when Interior Secretary Doug Burgum ordered ...
