

Large-capacity solar-powered containers used at drilling sites

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy when regulatory or client requirements demand it.

Mobile solar containers enable total off-grid operation, providing power in locations with no utility grid or where grid access is unreliable. This is essential for rural development projects, ...

Explore our range of high-efficiency solar container solutions designed for businesses worldwide. Our containers combine cutting-edge technology with durability and ease of deployment.

An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

While mobile solar containers serve mining operations requiring 500 kW temporary power, sales cycles average 18-24 months with stringent site-specific customization.

A 40ft MEOX Solar Container (226 kW) was deployed to supply stable power for drilling machinery, lighting systems, and on-site accommodation in a remote mining camp.

The Mobil-Grid [®] is the ideal solution for use in isolated areas, for large ground-mounted generators or for parks connected to the grid. For use on isolated sites, storage batteries can be supplied in a ...

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing solar power. In this guide, we'll explore the ...

We are actively driving the evolution towards emission and noise compliant power solutions at worksites. The mobile solar container range redefines on-site power by harnessing the sun's energy in an ...

Description and generalization are given for the main objectives for this system when used on drilling rigs isolated within a single pad, whether these are fed from diesel gensets, gas piston power plants, ...
