

Lithium battery pack replaced with 188650

What is a 18650 battery?

An 18650 is a lithium ion rechargeable battery. Their proper name is "18650 cell". The 18650 cell has voltage of 3.7v and has between 1800mAh and 3500mAh (mili-amp-hours). 18650s may have a voltage range between 2.5 volts and 4.2 volts, or a charging voltage of 4.2 volts, but the nominal voltage of a standard 18650 is 3.7 volts.

Are 18650 batteries safe?

A 18650 protected battery is safer than an 18650 unprotected battery (less likely to overheat, burst or start on fire). Unprotected 18650 batteries are cheaper, but we do not recommend their use. Unprotected batteries should only be used where the load/draw and charging is externally monitored and controlled.

Why should you choose 18650 battery store?

At 18650 Battery Store, we have over a decade of experience and strong, long-standing relationships with leading manufacturers. We carefully select only Grade A cells and work directly with manufacturers to ensure precise specifications for voltage, resistance, and capacity.

What is the difference between a 21700 & 18650 battery?

The 21700 at 1550 cubic mm, is larger than the 18650 battery - the 21700 and 18650 is not interchangeable. A battery might say protected mode 3.7v 18650 3000 mAh low self discharge for high drain devices. What does that all these features mean? "protected mode" means it has an overcharge and overdraw circuit protection built in (more info below).

What is a 18650; protected versus unprotected cells; best 18650 battery, charger and flashlight; and top picks for best 18650 battery.
