

Maria telkes the sun queen

Discover the life and groundbreaking work of Maria Telkes, a pioneering scientist and inventor known as the "Sun Queen." Learn about her contributions to solar energy technology and ...

In 1939 MIT hired Telkes, a Hungarian immigrant and one of the very few women in engineering, to join its nascent solar program. Like Cabot she was a fervent believer in solar energy's ...

Maria Telkes, known for her invention of the solar distiller and the first solar-powered heating system designed for homes, was one of the first people to predict the boundless possibilities ...

Here are a few of her best-known creations, innovative evidence that the nickname bestowed upon her by the media--the Sun Queen--was well-earned.

In the winter of 1948, Maria Telkes, a Hungarian-American scientist often called "The Sun Queen," helped build a house in Massachusetts that stayed warm all winter using nothing but ...

Telkes's ideas for harnessing the energy of the sun were visionary, even if the methods were initially flawed. Although active solar-heating technology has largely been abandoned, Telkes's ...

Her colleagues began to call her "The Sun Queen," a nickname that honored her innovative use of sunlight to solve one of humanity's most basic survival needs. Despite this ...

National Inventors Hall of Fame (NIHF) Inductee Maria Telkes devoted her professional life to this undertaking, and in the process invented some of the world's first solar heating systems, ...

Her groundbreaking contributions to the field of solar energy earned her the affectionate moniker of the "Sun Queen," a title that reflected her unparalleled dedication and leadership in harnessing solar power.

Today we tell the story of Maria Telkes, one of the developers of solar-thermal storage systems. Telkes was so dedicated to the world of solar energy that while she was working at the...
