

# Microgrid Design Competition

There are many communities in the world vulnerable to natural disasters, however, they require support and expertise to develop microgrids. Using our technical, regulatory and policy expertise on ...

Design 100% carbon neutral microgrids at the lowest cost. More than 215,000 microgrid and DER designs have been optimized through Xendee. Minute-by-minute AI enabled forecasting for ...

The mission is to enable the technological, operational, and business models that will help communities reduce costs, promote clean energy, and build reliability and resiliency into the grid. NY Prize is a ...

Intended for use in the early stages of the design process, MDT uses powerful search algorithms to identify and characterize alternative microgrid designs in terms of user-defined inputs and objectives ...

A first-in-the-nation \$40 million competition is planned to help communities create microgrids--standalone energy systems that can operate independently in the event of a power outage.

This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e.g., utilities, developers, ...

For the 2009, 2011, and 2013 competitions, Solar Decathlon sponsor Schneider Electric provided microgrid design and engineering services as well as electrical distribution equipment ...

Together, GOSR and NYSERDA will challenge communities, businesses, entrepreneurs and electric utilities to design and implement community-based microgrids, which offer energy independence as ...

Cummins recently teamed with ESTECO to co-sponsor the Microgrid Design Competition. The competition attracted teams of engineers from 56 universities representing 15 countries around ...
