

Moldova energy storage regulations

Will Moldova's electricity market be integrated into the European market?

Its adoption will support the greater integration of Moldova's electricity market into the European market. As the author of the draft law, the Ministry of Energy has proposed several specific objectives aimed at supporting the development of energy infrastructure and promoting competition in the electricity market:

Does Moldova import electricity?

The Republic of Moldova's energy sector is heavily reliant on imports, with 80% of its electricity being imported in 2020. Prior to the war in Ukraine, the electricity was mainly imported from Ukraine. Since November 2023, the MGRES gas-fired power plant in Transnistria is making up for the electricity import deficit from Ukraine.

What is Moldova's energy package?

This package has been mandatory for transposition into Moldovan legislation since 2022, as part of Moldova's commitments as a contracting party to the Energy Community Treaty. Its adoption will support the greater integration of Moldova's electricity market into the European market.
