

Nordic first energy storage project

The project, which will add 70 MW/140 MWh of storage to its Finnish renewable assets, is set for completion in 2026 in Nivala Municipality, Ostrobothnia. This development follows a significant wind portfolio ...

“Think of supercapacitors as the sprinters of energy storage,” says Dr. Lena Fjellström, project lead at Nordic Energy Research. “They’re not here to replace marathon-runner batteries, but to handle those ...

With existing interconnections to the UK, Germany, the Netherlands, Poland, and the Baltics, the Nordic region already serves as a key energy storage provider for the rest of Europe.

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary services to help balance the grid for ...

According to Renewable Energy Magazine, energy company Nordic Solar has signed a credit agreement with Danish bank Ringkjøbing Landbobank to bring the energy-storage site to fruition.

A battery-storage project that will become the biggest in Finland has been given the go-ahead to start construction. The final investment decision, taken in late February by SEB Nordic...

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's ...

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone investment represents a ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage system (BESS) in ...

Merus Power, together with Alpiq, has achieved a historic milestone for the Nordic energy market: the delivery of the region's first grid-forming battery energy storage system (BESS).
