North American Data Center Battery Cabinets with Constant Temperature and Humidity

State of Health (SoH) Vertiv EnergyCore tracks battery health across all levels, enabling smarter maintenance and longer battery life.

When you want power protection for a data center, production line, or any other type of critical process, ABB"s UPS Energy Storage Solutions provides the peace of mind and the performance you need.

Our Nitrogen N2 Dry Cabinets provide superior, stable, and fast-recovering ultra-low humidity storage. By displacing ambient air with inert nitrogen gas, these cabinets create the perfect environment to ...

With proper powder coating or specialized fire-resistant coatings, cold rolled steel battery enclosures provide cost-effective solutions for indoor industrial battery cabinets, telecommunications battery ...

Vertiv EnergyCore cabinets are optimized for five minutes end-of-life runtime at 263kWb per each compact, 24" wide (600mm) cabinet, and operate across a wide temperature range, making ...

Global Power Supply provides secure, industry-compliant cabinet systems for data centers, hospitals, and other critical facilities that depend on uninterrupted power.

MBCs are designed for use in a data center, network room or of-fice environment and can use the ventilation provided for human occupancy. All battery types work on the principle of chemical ...

We carry a full line of factory-assembled cabinets designed for data center UPS backup systems with pure lead agm batteries.

Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and monitoring features.

Our climate controlled storage cabinets deliver stable temperature and humidity, so rubber, polymer, and composite materials age slower, inspections pass more often, and field crews stay ready.
