

Outdoor power supply with standby electric box

How long can a portable power station run?

It all depends on the power station and the device or devices you're charging. As a general rule of thumb, to figure out how long your portable power station can run, divide battery capacity (Wh) by power drawn by the device (W). What is UPS and why do I need it?

How much power does a portable power station need?

Small devices like a laptop and coolers tends to need around 60 to 100W of continuous power whereas appliances like fridges can need up to around 800W. So, a large portable power station with a higher output is best for powering large devices, or more devices at once.
