

Outdoor solar charging machine

Can a solar charger charge a phone?

Solar chargers, combined with a power bank or backup battery pack -- particularly those that can accommodate through charging (i.e., charging itself while charging devices) -- are the best, lightest way to charge your electronic equipment. While most adventurers are looking primarily for a portable phone charger, solar chargers can power:

What is the best solar power charger for outdoor use?

Our overall winner is the 1 pound, 5 ounce BigBlue 28W USB Solar Charger for most outdoor use. It's a simple, lightweight, and powerful solar power charger that seems to provide a little more power than its competition. It will also provide enough power in direct sunlight to charge multiple small devices for one or two people.

What is a solar power charger?

There's a lot to understand about solar power chargers, but at their heart, a small solar panel consists of several photovoltaic cells grouped together to absorb some of the sun's energy and convert it into an electric charge that you can use to charge electronics.

Are portable solar chargers a viable way to provide electricity outdoors?

Thanks to efficiency advances and cost decreases in solar cells, portable solar chargers are finally proving to be a viable means of providing electricity outdoors. A backcountry user might carry a smartphone, GoPros, headlamp, tablet, camera, headphones, and PLB or GPS devices.
