

Photovoltaic solar panel soldering machine

SC SOLAR's auto bussing machine is mainly used for busbar welding of solar modules, compatible with cell size of 156*156mm to 230*230mm and busbar quantity of 5BB ...

The ETS6000 is our fastest infrared stringer machine designed to solder TOPCon, Back contact, HJT, PERC solar cells into strings at a throughput of 6000 cells/hour for half cut cells.

Find high-speed solar cell soldering machines for efficient production. Shop our collection of reliable, durable, and precise solar cell welding equipment.

MS100B MBB PV Cell Soldering Stringer is a fully automatic machine used to solder the mono-Si or poly-Si cells into a string. It can work with 156-220 (3BB-15BB) cells or 156-220 (full, half-cut or 1/3 ...

One of the most critical machines in the Solar/PV production line is Stringer attaches and solders ribbons on the photovoltaic cells IBC, MBB, and various busbars, ensuring that the cells are aligned ...

In essence, PV cell soldering stringer machines are the backbone of solar panel assembly lines, directly impacting the performance and longevity of the final product.

Our solar stringer machine operates 24/7, 365 days a year. Capable of single track interconnecting 5000 solar cells per hour. The Tape Solution can integrate into any production line. Leaving a small factory ...

The solar stringer machine is used to solder solar cells together with the use of bus bars into forming strings. This category of assembly equipment is one of the most sensitive since the ...

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...
