

Port-au-prince commercial microgrids

Princeton Power Systems will be supplying its core technology for the first project engineered by Geninov Group of Canada, a consulting engineering firm, and funded by the World ...

The project aims at defining optimal control strategies of microgrids in the port area, including the management of electric vehicles with public charging stations, ...

To get to Les Anglais, we flew to Miami, then, after a six-hour flight delay, to Port-au-Prince. The next morning, we took a five-hour bus ride to Les Cayes where we met Adam and ...

Billed as Port au Prince's first PV power plant, the solar-energy storage system will also provide Wi-Fi connectivity across the park grounds, which includes the Triumphe Cultural Center.

We completed another PV microgrid in the Exuma Cays at the end of 2023. This system offsets approximately 96% of the diesel consumption of the island, and ongoing energy efficiency ...

We work with customers across their ports" electrification needs, whether helping to improve existing assets or to increase energy efficiency through energy management systems and microgrids, shore ...

On November 20th, 2012, EarthSpark International launched Haiti's first pre-pay microgrid. Called EKO Pwòp (short for Elektrisite Kominote Pwòp, or "clean community electricity") the grid enabled the 14 ...

Commercial renewable microgrid systems aren't just nice-to-have anymore - they're becoming essential infrastructure. Let's unpack why forward-thinking companies are racing to adopt these solutions.

By developing advanced control strategies, real-time simulation models, and hands-on power electronics applications, this research aims to ensure that port facilities remain operational and ...
