

President of the Black Photovoltaic Energy Storage Association

Why is supporting black solar important?

Supporting Black solar supports developers and properly endows a value-chain in which Black and business owners participate. That includes workforce, financing and supply chain development. Barriers to entry in the solar field are exceptionally and unnecessarily high.

Should Black communities invest in solar energy developers?

Join our mailing list! Investing in Black renewable energy developers will ensure the trillion-dollar transition to a low-carbon economy diversifies wealth creation and does not elude Black communities. Fairly accessing solar development is the sine qua non of wealth creation opportunities that emanate from that access.

Should Black Solar be supported?

Fairly accessing solar development is the sine qua non of wealth creation opportunities that emanate from that access. Supporting Black solar supports developers and properly endows a value-chain in which Black and business owners participate. That includes workforce, financing and supply chain development.
