

Reduced carbon emissions moldova

This initiative supports the Government of Moldova to improve energy policies and institutional capacities to foster the clean energy transition and decarbonisation, by aligning legal frameworks ...

Republic of Moldova emitted 6.94 megatonnes of CO₂-equivalents in the latest year-about 0.01% of the global total. On a population basis, emissions are around 2.3 tonnes per capita ...

Moldova is moving forward on its low-carbon and climate resilient development pathway, with strong support from the EU and international financing institutions.

Reducing highly potent but short-lived climate pollutants like methane, black carbon and HFCs is our best chance at avoiding runaway climate change. Here's how Moldova is reducing emissions.

During 1990-2020, total GHG emissions in the Republic of Moldova decreased by approximately 69.8%, up to 13,662 Mt CO₂ equivalent, as a result of the economic crisis.

While today's final energy mix in the Republic of Moldova still heavily depends on fossil fuels and biomass, more ambitious climate mitigation policies are expected to lead to greater energy savings ...

Climate Actions Law. The Republic of Moldova adopted recently the Law No. 74 as of 11 April 2024 on Climate Action, enabling the low carbon development and climate resilience and establishing the ...
