

# Renewable energy growth armenia

Armenia's solar sector saw record growth in 2025, adding 615 MW to reach 1.1 GW total and meet a key 2030 national energy target five years ahead of schedule.

In response to growing concerns about energy security and climate change, Armenia is accelerating its transition toward renewable energy, which accounts for over 30% of its total electricity generation.

Armenia, a landlocked nation nestled in the South Caucasus region, is uniquely positioned to harness the power of renewable energy. With its vast natural resources, including abundant sunlight and ...

This remarkable growth highlights the country's commitment to transitioning toward renewable energy sources and reducing dependence on fossil fuels. The shift is driven by several ...

Armenia has made notable progress in expanding its renewable energy capacity, particularly through hydropower and solar energy. Hydropower is the largest renewable contributor, making up 7.1% of ...

According to the International Energy Agency, imports of oil and gas continue to cover 75% of Armenia's energy needs. However, the Government of Armenia has focused it's energy policy towards ...

Transitioning to renewable energy sources, particularly solar power, will reduce energy costs, improve energy security, and lower greenhouse gas emissions, positioning Armenia to meet ...

In the past decades, Armenia has achieved significant progress in utilizing renewable energy sources, primarily through hydropower, which has contributed between a quarter to a third of ...

Renewable energy resources, including hydro, represented 7.1% of Armenia's energy mix in 2020. Almost one-third of the country's electricity generation (30% in 2021) came from renewable sources.

Armenia is actively pursuing an energy transition, shifting from traditional fossil fuels to renewable energy sources to ensure sustainability, economic stability, and environmental responsibility.
