

Restrictions on solar glass are lifted

September 2025 brings major US solar policy shifts, from ITC guidance and tariffs to state battles over net metering, storage, and permitting.

President Donald Trump issued an executive order instructing the Department of Treasury to tighten restrictions on solar and wind tax credits, further clamping down on regulatory support that ...

The passing of H.R.1, the big beautiful bill, brings about drastic changes to the solar tax credit landscape. Sections 25D and 48E are affected and new FEOC restrictions are in place.

Proposed legislation may limit tax credits for solar and renewables, impacting supply chains, project timelines, and compliance with Foreign Entity restrictions

The Trump administration said this week that decisions involving solar and wind energy projects on federal lands must undergo strict "elevated" reviews by Interior Secretary Burgum's office to...

Now law, the One Big Beautiful Bill has major implications for residential solar and the tax credits claimed for installing these systems.

The One Big Beautiful Bill Act eliminates residential solar tax credits after 2025 and introduces new timelines and restrictions for clean energy tax credits under Sections 45Y and 48E.

On July 7, 2025, the president issued an executive order (the EO) directly targeting ITCs and PTCs for solar and wind facilities. The EO directs Treasury to issue new "beginning of ...

The bill, also known as the "One Big Beautiful Bill Act," contains a number of provisions relating to solar energy installations, including the cancellation of Section 25D tax credits at the end ...

The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of residential and utility-scale solar while undermining the ...
