

School Server Rack AC DC Integrated ODM

Designed to integrate seamlessly with standard enclosures, rack PDUs centralize power delivery by supplying multiple outlets from a single, organized unit. This ensures consistent, reliable power for servers, switches, ...

TDK-Lambda is a global supplier of rack mount and hot swap AC-DC power supplies in a broad range of power levels to fit many applications.

The Scout is a compact, high power density 12 volt rack mount DC power system that brings telecom power technology to 12 volt base station radio applications to power transmitters and maintain back-up batteries.

Vertiv's solution integrates the rack, bus bar distribution, and an intelligent power system into an autonomous DC power infrastructure, ready for an end-user or IT integrator to rack-n-roll their OCP-compliant server, ...

These servers enhance interoperability due to highly customizable components and firmware that can be tailored for compatibility across other systems to further meet customer specifications.

That's why we offer OEM/ODM services to tailor our products to your specific needs. Our experienced team can work closely with you to develop customized solutions that meet your exact specifications.

Using an active DC cooling system that features vents in the bottom and high-flow DC fans in the top, this rack keeps your equipment cool and reliable. Our nearly-noiseless DC fans are much quieter than other brands!

All in one 40F Container MDC fully integrated with standard rack, wall mount cooling, AC/DC power, battery, power distribution, security, monitoring and fire systems.

Designed to optimize the power performance between the power shelf and busbar in a data rack application, allowing for efficient energy transfer while minimizing power loss.

In v2, the battery packs are designed as part of the power shelves on the rack itself. This eliminates the need for battery cabinet and saves 4 rack positions in a row.
