

Simple power private network base station installation

Do not set up the base station directly beneath or close to overhead power lines or electrical generation facilities. The electromagnetic fields associated with these utilities can interfere with GNSS receiver ...

To do this, remove the power cable from the bottom of the Base Station, then use your own Phillips head screwdriver to remove the screw from the base. Twist the bottom of the Base Station off to reveal the ...

Use the guided flow below for an interactive, step-by-step experience that will help you through the installation process. [Base Station \(Gen 3\) Installation Guide](#)

Before installing your Base Station, you'll want to download the SimpliSafe® Mobile App on your phone or tablet. If you haven't already done so, you'll also need to create a SimpliSafe® Account.

We've covered how to set up your own temporary base to send RTCM correction data over a telemetry radio link, but what if you are a kilometer or more from your base?

Here are some key points to consider: **Location:** Choose strategic locations for base stations to maximize coverage. **Height:** Install antennas at a height that minimizes obstructions.

This user manual will guide you through the steps of how to configure and install your RTK base station and send the correction data

The three wires (white, black, and green) are attached to the power unit and ground (must be connected to earth ground). Seal the knockout to prevent water or moisture from entering the enclosure.

By adding an SNM941 Connected Site Gateway to the SPS modular base station, the T-Bar or Tripod setup can be used to provide corrections through the internal 900 MHz radio or 450 MHz radio and ...
