

Solar Power Plant Project Participants

Of the 576 gigawatts (GW) of newly installed capacity in 2023, 78%, or 447 GW, came from solar energy. The USA in particular, as the second largest solar market in the world, plays a crucial role in ...

Explore how community solar initiatives are transforming local energy by making clean power accessible, affordable, and community-driven.

Global Solar Power Tracker The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic ...

All these outputs are based on our database of some 25,000 solar power generating stations worldwide, including both operating plant and projects in development.

The database should help utilities, financiers, manufacturers, and anyone interested in renewable energy options to find information on the growing number of concentrating solar power projects ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

SEIA Members: Access the searchable database The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or ...

Renewable energy company Zelestra and Meta have announced an expansion of their clean energy partnership with a power purchase agreement (PPA), for the 176 MWdc (136 MWac) ...

For individual concentrating solar power projects, you will find profiles that include background information, a listing of participants in the project, and data on the power plant configuration.
