

Installations of solar power in Africa jumped 54% in 2025, new data shows, marking the fastest annual growth on record, driven by governments and development agencies deploying utility ...

In the sections that follow, we explore the top ten African solar markets in 2025, spotlighting countries that combine scale, growth momentum, supportive policy environments and ...

Africa's solar energy market continues to grow significantly. In 2025, the continent added more than 5,000 MW solar power capacity. In this article, we breakdown countries leading this drive.

Figures from the Global Solar Council (GSC) suggest that Africa added 4.5GW of new solar PV capacity in 2025.

For Africa's solar industry, 2025 was a significant turning point. In comparison to the previous year, the continent installed over 4.5 gigawatts of additional solar capacity, a 54% increase.

Africa recorded its highest-ever solar capacity additions in 2025, with a 54% year-on-year increase, led by South Africa and Nigeria. South Africa added 1.6 GW, Nigeria 803 MW and Egypt ...

The year 2025 marked an important milestone for Africa's solar sector. The continent added around 4.5 gigawatts of new solar capacity, representing a 54% increase compared to the previous ...

The report shows that Africa installed approximately 4.5 GW of new solar PV capacity in 2025, representing a 54% year-on-year increase

Solar installations rose 54% in 2025, reaching about 4.5 GW South Africa, Nigeria, Egypt, and Algeria led new capacity additions Africa could exceed 31.5 GW of installed solar capacity by ...

Africa's renewable energy transition is accelerating, supported by strong economic momentum, falling technology costs, and rising demand for reliable power. With economic growth ...
