

The father of China's solar photovoltaic power generation

China is rapidly transforming its energy landscape, with solar power at the forefront of this revolution. As the world's largest CO2 emitter, China's commitment to renewable energy is ...

In 2002, China's first domestic photovoltaic (PV) cell production line was put into operation, with 10MW of capacity. In 2004, China began exporting PV cells to Europe, taking ...

Yehdor, a 48-year-old herder from Xaghelesi Village in Tiegai Township, leisurely rode his motorcycle, driving his flock of sheep into the solar photovoltaic power plant owned by Huanghe ...

Professor Green is often called as "the Father of Photovoltaics". He thought he received such a reputation because he has been training many students who went on to have a big impact in ...

China has achieved stunning growth in its installed renewable capacity over the last two decades, far outpacing the rest of the world. But to end its continued dependence on fossil fuels, it ...

Aiming to take action in response to the investigation initialized by the USA, the "PV Generation Promotion Alliance" was set up by several major Chinese PV manufacturers, including ...

Sun Valley can be said to be the "Silicon Valley of China" that integrates production and manufacturing, talent training, and technology research and development.

In 2011, China owned the largest solar power plant in the world at the time, the Huanghe Hydropower Golmud Solar Park, which had a photovoltaic capacity of 200 MW. In 2018, it held the record again ...

Rapid solar capacity expansion overwhelms the grid, PV manufacturers compete for market shares, and then large target markets slap import tariffs on Chinese PV products, taking off ...

1984: Yunnan Semiconductor Device Factory introduced a monocrystalline silicon solar cell production line with the world's advanced level from the American SPIRE company, becoming ...
