

The world's first 1MWh sodium-ion battery energy storage system

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be deployed in a shared pilot with nine utilities and independent ...

GS-1.1 is the first commercially available sodium-ion battery energy storage system built for grid-scale deployment. Powered by NFPP chemistry, it operates without active cooling- a global first at scale. ...

On September 17, Chinese battery maker EVE Energy announced the successful connection of its first large-scale sodium-ion battery storage system to the grid at its Jingmen base. ...

Peak Energy's solution is the first battery energy storage system to remove nearly all moving parts with new patent-pending technology, driving significant cost-savings.

Peak Energy Delivers First Grid-Scale, Sodium-Ion Battery Storage System in the US. Peak Energy's solution is the first battery energy storage system to remove nearly all moving parts ...

The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, aiming to stabilize renewable energy and cut costs as China accelerates its ...

Recently, U.S.-based energy storage firm Peak Energy announced the commissioning of the world's first grid-scale sodium-ion energy storage system (NFPP) in Colorado.

Chinese energy storage and portable power system maker Bluetti has unveiled what it calls the "world's first" sodium-ion portable power station. Called the Pioneer Na, the system will be...

China unveils world's first sodium-ion battery-powered EV with 248-mile range CATL says the battery delivers triple LFP power at -30°C, keeps over 90% range at -40°C, and stays stable ...

LGES Vertech's battery energy storage system. It has already deployed what it calls the world's first grid-scale passively cooled sodium-ion battery at a site in Watkins,...

The world's first 1MWh sodium-ion battery energy storage system
