

Township container power generation installation station

PDV's Packaged Power Station (PPS) is a highly integrated, containerized solution for fast, cost-effective supply. Ideal for mining, islands, and temporary projects.

Backed by our extensive project delivery experience, we carry out EPC work for various types of power plant projects, including combined cycle power plants, biomass power plants, and wind farm projects.

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

Explore our fully integrated modular power substations with the USP& E Powerbox. These containerized units offer modular power plant capabilities for large industrial projects.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

We design and build container generator units, shipping container power units, and modular generator housing that meet the highest standards of safety and performance.

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual ...

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package, we ...

This innovative system is a fully autonomous electricity generation station, assembled from six High Cube 40-foot containers. The station is delivered in a Plug & Play format -- all you need is a levelled ...

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary power solutions. ...
