

Why the United States does not want photovoltaic panels

President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach ...

Solar panels aren't really made in the United States anymore, ...

These developments in solar industry conditions and policies have affected U.S. manufacturing capacity, solar PV installations, component imports, and workforce needs. Solar PV manufacturing has five ...

In countries like Germany, balcony-mounted solar panels are all the rage. But from breaker-masking to voltage mismatches, America's grid isn't ready for it--yet.

The green energy revolution in the United States has run almost unopposed for the last two decades. Driven by the fear of human-caused global warming, federal regulators enacted an ...

U.S. consumer demand for renewable energy continues to grow, with more solar panel capacity installed in 2024 than in 2023, which saw more than in 2022. But U.S. trade policy is in...

Solar panels aren't really made in the United States anymore, even though the market for them is larger than ever. Starting in the 1980s, leadership in the industry passed to Japan, then to...

Local governments in states such as California, Indiana, Maine, New York and Virginia have imposed moratoriums on large-scale solar farms, as a national push for cleaner energy has ...

To avoid reliance on its strategic adversary for a key technology, the United States has imposed various trade measures since 2012 to limit Chinese panels' access to the market and ...

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach...
